

Bellows vacuum suction plates, Softgrip – Series SBPL-SG

Product Description

Vacuum suction plate with 1.5 bellows for gentle handling of heavy but sensitive products (e.g. glass plates). Divided support surfaces prevent deformation of the product and provide a firm grip. Additional safety sealing lip on the support block positions the product orthogonally to the ground. Connection via an interlocking, snap-in aluminum plate.

Advantage

- > Very careful handling due to soft sealing lip and lightly compressing bellows
- > Swinging of the product is prevented by support block and security and sealing lip
- > Cost-effective replacement of worn seals
